ABOUT MYSELF

B.Tech Artificial Intelligence and Data Science student with a strong foundation in Python, SQL, Data Analysis, Artificial Intelligence, and Machine Learning. Interested in developing practical technology solutions and applying analytical and problem-solving skills to real-world challenges. Experienced in academic projects, hackathons, technical events, and software development internship environments.

EDUCATIONAL QUALIFICATION

B.Tech – Artificial Intelligence and Data Science	<i>2023 – 2027</i>
SRM Valliammai Engineering College, Kattankulathur, Chengalpattu	CGPA: 9.09
Higher Secondary Certificate (HSC) – 12th	<i>2023</i>
Government Girls Higher Secondary School	91.5%
Secondary School Leaving Certificate (SSLC) – 10th	<i>2021</i>
Government Girls Higher Secondary School	

AREA OF INTEREST

- Artificial Intelligence and Machine Learning
- Data Science and Data Analysis
- Python Programming
- Computer Vision
- Problem Solving and Logical Reasoning

TECHNICAL SKILLS

Programming: Python, C (Basic), Java (Basic), Prolog

Database & Tools: SQL, Excel

Core Skills: Data Structures, Problem Solving, Logical Reasoning, Data Analysis

PROJECTS

1. AI-Based Water and Nutrient Optimization for Vertical Farming

Duration: *Sep 2025 – Jan 2026*

Abstract:

An Artificial Intelligence-based system developed to optimize water and nutrient usage in vertical farming and hydroponic environments, improving resource efficiency, plant health, and crop productivity.

Explanation:

The system monitors water level, nutrient concentration, temperature, humidity, pH, and EC. AI and Machine Learning techniques analyze the collected data to provide suitable water and nutrient recommendations. Computer Vision is used for plant health monitoring and identifying signs of disease or nutrient deficiency.

Technologies Used:

Python, Machine Learning, Computer Vision, OpenCV, TensorFlow/Keras, Pandas, Scikit-learn.

2. Eco-Friendly Product Recommendation System

Duration: *July 2025*

Abstract:

A web application designed to help users discover suitable sustainable and environmentally friendly products based on their requirements and preferences.

Explanation:

The application provides information about eco-friendly products, including categories, descriptions, eco-friendly tags, sustainability scores, certifications, and prices. It organizes product information and provides relevant recommendations to encourage sustainable purchasing.

Technologies Used:

React, JavaScript, Node.js, Express.js, MongoDB, HTML, CSS, REST API.

3. MystiQ – Crime Investigation Game Application

Duration: *August 2026*

Abstract:

MystiQ is a crime-investigation themed game application developed for a technical event, where participants investigate clues, analyze evidence, solve puzzles, and identify the solution to a fictional crime case.

Explanation:

The application presents case information, clues, and evidence that participants analyze to progress through the investigation. The game encourages logical thinking, observation, problem solving, decision making, and teamwork.

Technologies Used:

React, JavaScript, HTML, CSS.

EXPERIENCE

Software Development Intern – eMudhra Limited, Bangalore

June 2026 – July 2026

- Worked with the Technology Innovations department on a web application for adversarial testing of chatbots.
- Designed test cases to evaluate chatbot robustness, safety boundaries, and failure modes.
- Gained practical exposure to product development, testing, analytical thinking, and problem solving.

Data Visualization Virtual Intern – Tata Forage

- Worked on data analysis and visualization projects using datasets to identify and present meaningful insights.

CERTIFICATIONS

- PERL Programming – IIT Bombay
- AWS Generative AI
- Introduction to LLM and Python for Data Science – NPTEL
- Python for Data Science – NPTEL
- Introduction to Image Generation – Simplilearn
- AI and its Prospects & Applications
- Ethical Hacking and Bug Hunting Masterclass
- Python Workshop – Prince Technology
- Full Technical Training – IIT Madras

HACKATHONS & TECHNICAL ACTIVITIES

- Riseovate 2K25 – 24-Hour Hackathon
- ImpactX 3.0 – 24-Hour Hackathon
- Participated in CTF and technical competitions
- Participated in technical symposium activities
- Organized departmental symposium events
- Organized Comic Clash technical event
- Developed MystiQ – Crime Investigation Game
- Developed Quiz Application for Technical Symposium

ACHIEVEMENTS

- School Topper in HSC
- Class Topper in SSLC / Matriculation
- Secured 9.09 CGPA in B.Tech
- School Pupil Leader
- Class / Team Leader
